1. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrases "communicating a surface" on line 7 of claim 1 and "communicates a surface" on line 8 of claim 4 are confusing. While applicants may be their own lexicographer, the manner in which "dent" is used in claims 1-4 is very awkward. In addition, "the another insertion piece in a direction separating from the molding insertion member" in claim 4 lacks antecedent basis within the claims.

With regard to claims 5 and 6, these claims are also indefinite because it is not clearly stated when during the practice of the claimed method the insertion member is of a convex or concave shape and when it is of another shape. Clarification is required.

2. Coffman (3,733,159) discloses a method similar to that of instant claim 6 except that member 14a does not become part of the article formed.
